

## Staff Summary Report

---

**Council Meeting Date:** 01/22/2009

**Agenda Item Number:** \_\_\_\_\_

**SUBJECT:** Request to award a two-year contract with three, one-year renewal options to Complete Coach Works for transit fleet mid-life refurbishment services.

**DOCUMENT NAME:** 20090122fslg09      **PURCHASES (1004-01)**

**SUPPORTING DOCS:** Yes

**COMMENTS:** (RFP #09-003) Total cost for this contract shall not exceed \$3 million during the initial contract period.

**PREPARED BY:** Lisa Goodman, CPPB, Procurement Officer, 480-350-8533

**REVIEWED BY:** Michael Greene, CPM, Central Services Administrator, 480-350-8516  
Glenn Kephart, Public Works Manager, 480-350-8205

**LEGAL REVIEW AS  
TO CONTRACT FORM**

**ONLY:** N/A

**FISCAL NOTE:** Sufficient funds have been appropriated in 6001919-7526 for the anticipated expenditures of the current fiscal year.

**RECOMMENDATION:** Award the contract.

**ADDITIONAL INFO:** The City of Tempe issued a Request for Proposal in order to contract with a qualified contractor to mechanically and cosmetically refurbish the City's bus fleet up to one-hundred five (105) vehicles. Purchased from 1998-2004, Tempe's bus fleet is in the latter half of its useful life and requires targeted mechanical and cosmetic refurbishment to ensure transit service performance is maintained and meets citizens' expectations. The investment in the present fleet is needed to bridge the 2-4 year time frame when new replacement buses will be phased in.

The solicitation was sent to over 100 firms with only one response received. A committee comprised of Public Works and Procurement staff, along with a representative from Veolia Transportation reviewed the proposal. It is the recommendation of the committee to award the contract to Complete Coach Works (CCW). The prices offered have been carefully reviewed and are considered fair and reasonable.

Based on a comprehensive inspection process to be conducted by CCW and following consultation with Veolia Transportation and third-party fleet maintenance professionals, city staff will authorize selective refurbishment of those buses and components that will yield the greatest value for the investment. Although the cost structure for this project is built on the maximum cost per component per bus, the actual cost per bus will be based on actual needs as revealed through the inspection process.

Renovation • Parts • Modification

October 20, 2008

Reference: City of Tempe RFP 09-003 "Transit Fleet Mid-Life Refurbishment"

Dear Ms. Goodman,

On behalf of Complete Coach Works, I am pleased to submit this response to your Request for Proposal no. 09-003 "Transit Fleet Mid-Life Refurbishment" and we acknowledge receipt of addendum number one (1), two (2), three (3), four (4), five (5), and six (6).

Complete Coach Works has been supplying bus rebuilding, remanufacturing and retrofitting services to the Transit industry for over 20 years and we are confident that we are uniquely qualified to perform the refurbishment work as specified by this RFP.

Attached please find our technical proposal, required documents, and price sheet.

We appreciate the opportunity to participate in the City of Tempe transit bus mid-life refurbishment project and look forward to your favorable response.

Sincerely,

A handwritten signature in black ink, appearing to read 'Kevin O'Brien', is written over a horizontal line.

## ***Section 2: Experience in Bus Fleet Rehabilitation***

Complete Coach Works' sole business for more than twenty-one years is providing remanufacturing, modification, retrofitting, accident and burn repairs, paint, body, and decal services to the transportation industry. This single focus has allowed us to accumulate vast experience in all aspects of vehicle systems, and uniquely qualifies us to perform all phases of this project.

### **Profile of Complete Coach Works**

Complete Coach Works' sole business is providing remanufacturing, modification, retrofitting, accident repair, burn repair, paint, body, and decal services for transit buses. This single focus has allowed us to accumulate vast experience in all aspects of bus systems, and uniquely qualifies us to perform all phases of this project.

Our intimate knowledge of NABI, El Dorado, Gillig, New Flyer, MCI, RTS, and Optima buses acquired through numerous rehabs, retrofits, accident and burn repairs, as well as complete paint jobs performed on these buses by our staff will assure City of Tempe a smooth and timely project performed at the highest possible level of quality.

Complete Coach Works has never been terminated for breach of contract or non-performance.

The following projects are just the most recent examples of complete transit rehabs, fire damaged and accident repairs. They will completely document our ability to work on every system on a transit bus including all systems and tasks outlined in this IFB.

#### **Long Beach Transit**

Rolando Cruz, Director of Maintenance

1863 East Anaheim Street

Long Beach, Ca. 90801

(562) 591-8753

**Scope of Work**

Cosmetic Rehab of 30 2001 Optima 30' buses including replacing and upgrading exterior and interior body panels, wheel well flares, entrance and exit door modifications, LED lights, Fire Suppression upgrades, replacement of the rubber flooring, USSC drivers seat rebuild, USSC passenger seats upgrades and seat inserts, interior lights and lens, paint exterior and interior with graphics.

**City of Fairfield**

Mike Nigliazzo, Director of Maintenance

702-428-7414

**Scope of Work**

8 Gillig buses, Complete Rehabs including all new bus wiring and upgrade to I/O multiplex system retrofit, Twinvision signs, talking bus, LED light upgrade, S 40 repowers Allison B 400R transmissions, structural repairs including outriggers, plywood subfloors, new flooring, new 3 minute windows paint and body work and converting two of the buses to CNG including retrofitting a DDC S 50G gas engine, designing and installing the CNG fuel storage and delivery system

**LADOT**

Kelly Ellsworth

213-977-7000

**Scope of Work**

100 buses including Gillig buses, Neoplan buses and Stewart and Stevenson buses received Complete Rehabs including structural and outrigger repair, major body rust repair and repaint, subfloor and floor replacement, new drivers seat, fire detection and suppression system, Twinvision signs, LED lights Cummins ISC and ISM engine repowers including Johnson Mathey CRT traps,

**City of Modesto**

Fred Cavanah, Transit Manager

209-577-5295

**Scope of Work**

18 Gillig buses, Complete rehabs including structural and outrigger repair, major body rust repair and repaint, new drivers seat, LED lights, subfloor and floor replacement, Luminator destination signs, suspensions rework, upgrade of entire rear axle assembly, Cummins ISC repower and video recorder upgrade.

**Foothill Transit**

George Karbowski, Operations Director

626-967-2274

**Scope of work**

108 Gillig buses, heavy maintenance including structural, body and rust work and repaint, Twinvision sign upgrade, new drivers seat, LED lights, interior upgrades featuring Complete Coach Works exclusive urethane structural coating on dash and interior components, re-upholstery suspension and differential repairs.

**Town of Chapel Hill North Carolina**

Mr. Don Wells

919-968-2755

**Scope of work**

15 RTS buses, complete rehab including repowering from a Detroit Diesel 6V92 to a DDC S 50 engine, all new seats, new floors, complete suspension and brake system rehab, paint and body work.

**Central Arkansas Transit**

Mr. Barry Beaver, Director of Maintenance

501-375-4125

**Scope of Work**

Complete rehab of 11 RTS buses including complete upgrade of the electrical system to an Allen Bradley multiplexing system, cutting five of them in half and shrinking them by five feet creating a 35 foot bus out of a 40 foot bus. Other work included conversion from a 6V92 DDC engine to a S 50 engine, complete interior rehab, complete suspension and brake system rehab, paint and body work

### **OMNITRANS**

Mr. Bob Bach

909-379-7162

Scope of Work

23 Orion buses, repower with new Cummins 8.3 C Gas Plus CNG engines, add LED lighting, new drivers seats, bodywork and paint.

### **Greyhound Lines Inc.**

Mr. Joe Schimeck

972-789-7301

Scope of Work

210 MCI 102DL buses were processed through our facility in 12 months. Each bus was retrofitted with a Ricon cartridge style lift, including cutting a door into the side of the door, engineering and incorporating proper structural reinforcement in the roof line, complete refurbishment of the interior including new floors, new seats, new side and ceiling carpet and fabric, body work and paint.

### **Disneyland, Anaheim, CA**

Mr. Lew Berkheiser

407-824-4221

Scope of Work

114 tram cars use in groups of 7 cars per string, a multi stage project including cutting in a step pocket for the attachment of individual doors in parking lot

trams. Second phase is to mount the doors and the linkages, and final phase will be to add PA system including speakers, microphone and amp and complete repaint.

### **San Francisco Muni**

Mr. Gary Chang, Project Engineer

415-401-3173

Scope of work

45 Gillig buses, cosmetic and safety rehab including paint, bodywork, decals, interior repairs, and installation of Cleaire Longview PM traps.

### **Riverside Transit Agency**

Nick Burrie, Maintenance Superintendent

1825 Third Street

Riverside, Ca. 92507

951-684-0850

Scope of Work

Repair of accident damage to 2002 NABI 04.15 CNG bus. Provided transport of bus #2226 from Riverside Transit Agency Riverside, California location to Complete Coach Works Riverside California facility. Repaired accident damage to curbside rear structure, replaced rear cap, replaced curbside rear exterior panels, replaced rear engine door assembly, replaced rear bumper, replaced engine guard, replaced hydraulic reservoir and support, replaced engine cradle, pressure tested radiator/CAC, replaced all accident damaged air, coolant, hydraulic, air intake, air conditioning, and exhaust hoses and piping, replaced Series 50 engine crank shaft pulley, replaced Series 50 engine oil pan, replaced Series 50 engine flywheel housing, dyno-tested Series 50, replaced ZF transmission, repaired interior settee structure, repaired interior rear sub floor and sub floor structure, replaced rear Altro flooring, recharged air conditioning system and made functional. Once repairs were completed then accident damaged

exterior panels were painted and re-decaled. Provided return transport of repaired bus to Riverside Transit Agency Riverside, California location.

### **Long Beach Transit**

Jim Ditch, Director of Maintenance

1863 East Anaheim Street

Long Beach, Ca. 90801

(562) 591-8753

#### **Scope of Work**

Repair of accident damage to 2002 New Flyer D40LF Low Floor bus. Provided transport of bus #2227 from Long Beach Transit Long Beach, California location to Complete Coach Works Riverside California facility. Replace or repair the accident damaged to the front cap and front cap frame structures, front bumper assembly, interior and exterior panels, front windshields, entry way rubber flooring, entry door assemblies, front dash panels, curbside head light assembly, wheelchair lift mechanism, and wheelchair lift platform. Once repairs were completed then accident damaged exterior panels were painted and re-decaled. Provided return transport of repaired bus to Long Beach Transit Long Beach, California location.

### **Gardena Municipal Bus Lines**

Jim Calhoun, Maintenance Superintendent

15350 South Van Ness Avenue

Gardena, CA 90249-1989

310-329-3825

#### **Scope of Work**

Numerous major and minor accident repairs over the last several years to both the RTS and New Flyer (Hybrid) fleet. Work Included major frame, structural, body, interior, electrical, engine, transmission, and HVAC repairs, as well as paint and decals.

### **City of Modesto**

Fred Cavanah, Transit Manager

209-577-5295

#### **Scope of Work**

18 Gillig buses, Complete rehabs including structural and outrigger repair, major body rust repair and repaint, new drivers seat, LED lights, subfloor and floor replacement, Luminator destination signs, suspensions rework, upgrade of entire rear axle assembly, Cummins ISC repower and video recorder upgrade.

### **North County Transit District**

Mike Wygant Director of Maintenance

303 Via Del Norte

Oceanside, Ca. 92504

760-967-2848

#### **Scope of Work**

Numerous major and minor accident repairs over the last several years to both the New Flyer and Champion fleet. Work Included major frame, structural, body, interior, electrical, engine, transmission, and HVAC repairs, as well as paint and decals.

### **First Transit (Foothill)**

Greg Barnett Maintenance manager

5640 Peck Road

Arcadia, Ca. 91006

626-357-7912 Ext. 255

#### **Scope of Work**

Numerous major and minor accident repairs over the last several years to both the Gillig and Nabi fleet. Work Included major frame, structural, body, interior, electrical, engine, transmission, and HVAC repairs, as well as paint and decals.

### **Santa Clarita Transit**

Robert Cavazos, Maintenance Manager

25663 West Avenue Stanford

Santa Clarita, Ca. 91335

661-294-2530

#### **Scope of Work**

Repair of accident damage to 2000 Gillig Phantom bus. Provided transport of bus #151 from Santa Clarita Transit Santa Clarita, California location to Complete Coach Works Riverside California facility. Repaired accident damage to front and curbside exterior panels, repair front frame structure, replaced entry doors, replaced interior dash components, replaced entry flooring, replaced entry step well, repaired wheel chair lift, and replaced destination sign window frame. Once repairs were completed then accident damaged exterior panels were painted and re-decaled. Provided return transport of repaired bus to Santa Clarita Transit Santa Clarita, California location.

### **Capital Metro (Austin Texas) for Gillig Corp.**

Mr. Robert Birdwell, Executive Director of Quality and Service

510-785-1500

#### **Scope of Work**

Repair of fire damaged 2001 Gillig Low Floor bus. Provided transport of bus #8850 from Capital Metro Austin, Texas location to Complete Coach Works Riverside California facility. Repaired the fire damaged engine compartment, interior, and exterior, including engine, transmission, all hoses, piping, wiring harnesses, Allen-Bradley wiring harnesses, insulation, lights, electrical boxes, cooling system components, hydraulic system components, air system components, air intake components, air conditioning system components, interior settee sheet metal, settee seat inserts, interior settee air conditioning bulkhead, interior ceiling panels, interior light assemblies and interior air conditioning vents, repair and replace seats and seat inserts to the rear of exit doors, interior side panels to the rear of the exit doors, curbside and street side rear window glazings,

exterior panels, exterior roof panels, as well as the damage to the areas in the air conditioning compartment. Once repairs were completed then fire damaged exterior panels were painted and re-decaled. Provided return transport of repaired bus to Capital Metro Austin, Texas location.

**Globe Ground (Los Angeles International Airport LAX)**

Dan Bletzacker Maintenance Manager

7025 West Imperial Highway

Los Angeles, Ca. 90045-6393

(310) 646-1942 ext. 203

**Scope of Work**

Repair of fire damaged 2001 Gillig Phantom L.N.G. bus. Provided transportation from Globe Ground Los Angeles International Airport (LAX) location to Complete Coach Works Riverside, California facility Repaired the fire damaged engine compartment, including all hoses, piping, wiring harnesses, engine compartment interior and exterior panels, insulation, lights, electrical boxes, rear settee seats, cooling system components, hydraulic system components, air system components, air intake components, air conditioning components, areas in the air conditioning compartment above the engine compartment as well as the damage to the engine and transmission. Once repairs were completed the repaired exterior panels were painted to match and re-decaled. Provided return transport of repaired bus to Globe Ground Los Angeles International Airport (LAX) location.

**Utah Transit Authority for Gillig Corp.**

Mr. Robert Birdwell, Executive Director of Quality and Service

510-785-1500

**Scope of work**

96 Gillig buses, travel to Utah and perform structural repairs to rear door frames consisting of removing external and internal panels, aligning the frame and welding in gussets, reattaching the skin and painting the repaired areas to match.

**Orange County Transit Authority**

Mr. Dennis Elafonte

714-560-6592

**Scope of Work**

42 Gillig buses, 6V92 .1 Emission certified engines and catalytic converters, install new Allan Bradley PLC multiplexing system including programming of the PLC for the entire bus operating logic, bodywork and paint, new decals, new front step wells, new rear pressure sensitive step treads and sensor relocation.

**Orange County Transit Authority**

Mr. Douglas Riede Sr Procurement Administrator

714-560-5624

**Scope of Work**

4-0970 Major Body Repair – Large Buses

Numerous accident and burn repairs over the last several years to the Nabi, Gillig, and New Flyer fleet. Work Included major frame, structural, body, interior, electrical, engine, transmission, and HVAC repairs, as well as paint and decals.

### ***Section 3: Method of Approach***

Upon award of the contract, several pre-production meetings will be held. The first key meeting will be with City of Tempe staff to review the final configuration of the specifications, answer any questions that The City of Tempe project management staff may have, and to finalize the actual fleet inspection schedule keyed to the actual contract award date. This meeting will also provide a forum for Complete Coach Works to introduce all key project personnel to City of Tempe staff and begin a working dialogue intended to ensure smooth, clear, and timely communications between all members of the project throughout the duration of the project.

At this meeting Complete Coach Works will lay out our plan for the fleet inspection and the finalization of the project scope of work and cost schedule, to ensure we have City of Tempe's complete concurrence that our plan and methodology complies with their intentions and satisfies the technical specifications.

Once City of Tempe approves Complete Coach Works inspection Plan and schedule Complete Coach Works personnel will inspect the City of Tempe buses onsite at the cities East Valley Bus Operations and Maintenance Facility and develop a scope of work and the associated cost per line item as outlined in City of Tempe's Rehab scope of work. Once the inspections for each bus is completed and the scope of work clearly defined with the associated costs per line item then the inspection report for each bus will be delivered to City of Tempe's project management staff for approval. At this time, City of Tempe project management staff will approve and/or disapprove each bus defined scope of work and associated cost per line item. Once City of Tempe's project management staff processes the scope-of-work, the approved scope will be returned to Complete Coach Works project management staff.

Once the inspections are completed and the scope of work for each bus is approve by the City of Tempe then Complete Coach Works will hold internal project staff meetings to again review each step in the scope of work for each bus, clearly define the required bill

of materials, develop detailed daily tasks lists for each employee for each phase of the different bus makes and models scope of work, and detailed quality assurance check points and check lists.

Each of these steps will be reviewed and signed off by Dale Carson, President, of Complete Coach Works prior to final implementation.

Once all steps of the scope of work have been defined by task and by individual step the master schedule will be developed. Once a master schedule has been developed and been finalized a meeting will be requested with City of Tempe project management staff to review our proposed master schedule and approve. Complete Coach Works recognizes that the City of Tempe rehabs success depends on the collaborative effort of all parties and therefore, we will solicit and place great value on the input received from the City of Tempe's project staff, thereby insuring that the final product meets or exceeds their expectations.

As each bus's scope of work and costs are received after City of Tempe's approval process the final bill of materials will be updated and released for production. All materials purchased for this job shall be new and of first or OEM quality and kept in segregated inventory locations and tracked from purchase to receipt, quality assurance inspection, and final storage and final use by City of Tempe's bus number. This final component listing will be maintained for each bus detailing by serial number exactly what components went on each bus.

Post pre-production meetings will be held with all key personal involved to review the documented final approved scope of work for each bus and to ensure that every project team member has a clear understanding of the final version.

The project has now entered the full production phase. As each bus is brought into the facility a production cycle adhering to a strict schedule is begun.

## ***Proposal for Refurbishment to Occur at Complete Coach Works Facility, Riverside, CA***

### **Inspection and Transportation**

Prior to transport of each bus to be rehabilitated, CCW and City of Tempe project management staff will jointly inspect each bus. Additional work will be estimated, quoted and once approved by the City of Tempe Project Management Staff, the work will be completed and added to the final invoice as “*extra work.*”

Each bus selected for rehabilitation will be transported from the City of Tempe East Valley Bus Operations and Maintenance Facility to the CCW Riverside facility via trucks equipped with Landoll trailers. One-way transport is estimated at approximately 6-hours. Immediately upon arrival at CCW, each bus will be re-inspected, documented, and archived with digital photos.

### **Pre-Rehab**

Once each bus is properly received into the CCW facility, a thorough steam clean of the undercarriage and engine compartment will occur at our on-site environmentally friendly steam clean facility. This not only helps our mechanics work in a cleaner environment, but also allows better visual inspection of critical wear-and-tear items.

Following steam cleaning and delivery to its individual work area, each bus’s approved scope of work parts will be pulled from their segregated location in our parts warehouse and delivered to the production line location of the bus. The parts are then stored in a secure, locked container specifically located in each work area for each bus, until they are used for the rehab. Additionally, any “extra work” parts that have been ordered and received will be delivered to the production line container for that bus.

## **Rehab**

At this time, rehab per the production schedule and task list developed for the bus's approved scope of work commences. Quality Control checks will be performed and signed off as appropriate.

*Please see Complete Coach Works "Methods for Quality Control and Schedule Control" in Section 4.*

## **Final & Return Inspections**

Once the bus rehab is complete, final quality control checks will be made and signed off. Following final approval, the bus will be loaded on a Landoll-equipped truck and returned to the Tempe East Valley Bus Operations and Maintenance Facility.

Once the bus is delivered to the Tempe East Valley Bus Operations and Maintenance Facility, CCW and The City of Tempe project management staff will inspect the bus. If any defects are discovered, they will be corrected on-location (Tempe) and signed off by jointly by CCW and The City of Tempe project management staff. Upon final approval and acceptance, each bus can be returned to service.

## **Conclusion for Work to be Performed at CCW Riverside Facility**

Complete Coach Works Riverside facility offers significant advantages to our customers over on-location production when scopes-of-work exceed minor retrofits. In addition to a significant cost savings noted in the attached cost proposal including the LNG tank rehab, passenger seat rehab, and intensive interior detail of each coach, the CCW Riverside facility is designed for effectively producing quality transit bus rehabilitations. Our work areas are designed to keep parts specific to each job securely located in the immediate vicinity of the bus they apply. This allows faster turn-around and reduces significant additional costs associated with shipping parts and per-diem charges for our employees vs. transport charges.

Additional values associated with performing rehabs at our Riverside facility include established employee synergy, familiarity with tools and procedures, established relationships with local vendors, and of course, our proven track record of successfully completing jobs with the quality and service that has made Complete Coach Works, Riverside the facility of choice for thousands of bus rehabs for more than 20-years.

*In the event City of Tempe determines that work be performed at the Bus Maintenance/Transit Facility in Tempe, Arizona, please refer to location modifications below.*

#### **Fleet Inspection – Tempe, AZ**

Prior to each individual rehabilitation job, CCW and City of Tempe project management staff will jointly inspect each bus. Additional work will be estimated and approved prior to completion and added to the final invoice as “extra work.” Once each bus has an individual scope of work developed, scheduling of work and bay location will commence. Immediately following notice to proceed, each bus will be documented, and archived with digital photos.

#### **Pre-Rehab – Tempe, AZ**

A thorough steam clean of the undercarriage and engine compartment will occur either on-site. This not only helps our mechanics work in a cleaner environment, but also allows better visual inspection of critical-wear items.

Following steam cleaning and delivery to its individual work area, each bus’s approved scope of work parts will be inventoried and segregated to the best of our ability near each bus’s bay location until they are used for the rehab. Additionally, any “extra work” parts that have been ordered and received will be delivered to the corresponding bus’s bay and segregated with the other remaining parts for the rehab project.

#### **Rehab – Tempe, AZ**

At this time, rehab per the production schedule and task list developed for the bus’s approved scope of work commences. Quality Control checks will be performed and signed off as appropriate.

*Please see Complete Coach Works "Methods for Quality Control, and Schedule Control".*

**Final Inspections – Tempe, AZ**

Once the bus rehab is complete, final quality control checks will be made and signed off by both CCW and The City of Tempe Project Management staff.

If any defects are discovered, they will be corrected on-site and signed off by jointly by CCW and The City of Tempe project management staff. Upon final approval and acceptance, each bus can be returned to service.

## Project Management and Other Key Personnel

### Dale E. Carson, President

1986 to Present:

- President – Complete Coach Works
- President – Commuter Bus Lines, Inc. – Lynwood, CA

1976 – 1986 Hausman Bus Sales & Parts Co.

- Manager/R.H. Rebuilder – Honolulu, HI
- Assistant Manager – Gulfport, MI
- Maintenance Manager – South Gate, CA
- Mechanic – South Gate, CA

### Macy Neshati, VP, Sales/Contract Administrator

2000 to Present

- VP Sales and Marketing – Complete Coach Works

1997 - 2000

- VP, Materials Management – Complete Coach Works

1994 - 1997

- VP, Sales & Marketing – North American Fleet Services, Phoenix, AZ

1990 - 1994

- Sales Manager – Williams Detroit Diesel – Allison, Phoenix, AZ

**Chuck Barnes, VP, Production**

1998 to Present

- VP, Production – Complete Coach Works

1990-1998

- Production Manager – Complete Coach Works

1984-1990

- Mechanic – Danny Barnes Auto Electric – Riverside, CA

1984-1996

- Mechanic – Brownie Automotive – Riverside, CA

**Kevin O'Brien, General Sales Manager**

2008 to Present

- Q.C.& General Sales Manager

2001-2008

- Q.C. & Customer Service Manager – Complete Coach Works

1990 – 2001

- Field Service Manager – Power Plus Corporation, San Marcos, CA

1988 – 1990

- Project Manager / Prototype Manager – Amistar Corporation, San Marcos, CA

1984 – 1988

- Owner Operator – O'Brien's Truck & Auto Body Shop, San Marcos, CA

1980 – 1984

- Machine Repair / Electrician – Roberts Irrigation, San Marcos, CA

**Adequacy of Labor**

Complete Coach Works employs more than 100 full-time technicians and is fully capable of staffing and completing this project as indicated in the bid specifications. We will

commit all necessary resources including manpower and management needed to ensure timely completion.

Key staff throughout the contract will not be replaced or substituted without prior notice to THE CITY OF TEMPE staff and their concurrence. Key Staff contacts include:

Dale Carson-President (951) 675-5000

Macy Neshati-Vice President and Contract Administrator (951) 836-6525

Chuck Barnes-Vice President-Production (951) 836-6530

Brian Corn-Engineering and Quality Assurance Manager (951) 684-9585

Wayne Nelson-Assistant Project Manager (951) 684-9585

Charles Raybon – Director of Materials (951) 440-2885

Kevin O'Brien – General Sales Manager (951) 836-6533

#### ***Section 4: Quality Assurance/Control Program***

Complete Coach Works employs proactive quality assurance techniques that provide not only for impartial quality assurance inspections by non-production employees, but ongoing daily quality control inspections by the assembly and production people, which enhances pride of workmanship and accountability.

- 1) Inspection processes include each production employee placing a color-coded marking on all assembled parts including hose fittings, nuts, bolts, and brackets. This color-coded marking is an indication that the parts have been properly installed and torqued (if applicable) by that employee. This system allows the Quality Assurance Inspector the ability to hold a specific individual accountable if the part is found to have been improperly installed or torqued.
- 2) Each daily task is listed on a quality assurance checklist; each employee responsible for a given task signs his or her name upon completion. The Production Manager then checks and initials each task acknowledging that his staff has completed the work.
- 3) Finally this daily task list is reviewed and checked against the work, by the Quality Assurance Manger, as well as, the Vice President of Production and any discrepancies are noted. A meeting is then held with the Production Manager and the employee whose work did not conform and corrective action is taken.
- 4) Prior to final delivery the complete job is inspected along with a review of each of the daily quality assurance checklists. All discrepancies are confirmed corrected and the vehicle receives a final sign off from Quality Assurance as well as production.
- 5) For the materials aspect of the project our shipping and receiving department receives all shipments against Complete Coach Works issued Purchase Orders.

All goods receive incoming Quality Assurance inspections to confirm compliance to all purchase order terms and specifications. Serialized products such as emission control devices, differential components, engines, wheelchair lifts, transmissions, major electrical components, door motors, etc. have their serial numbers logged. All material is held in segregated areas, specifically for a project, by unit-number.

- 6) Upon installation on a specific vehicle all serialized components are tagged and logged by vehicle number on a component sheet. This sheet is filed with the warranty department along with delivery date and mileage providing us with complete documentation of each serialized component installed on a customer's vehicle.
- 7) Production schedule adherence is maintained through the use of job master schedules that are monitored and updated on a daily basis. The Production Vice President, the Production Manager and the Vice President of Sales, who also acts as the Contract Administrator, meet on a daily basis. Any project that falls behind shows red on the daily schedule status report. Only two issues cause delays: Parts shortages or labor shortages. Once the cause of the delay is determined action plans are developed:
  - a. If for parts shortages, parts can be expedited and brought in via airfreight, or alternate sources of parts are explored.
  - b. If for labor shortages additional resources are committed either in the form of extra manpower, extended shifts, weekend work, or all or any combination of the above until the job is back on schedule.
- 8) Daily monitoring of the active production schedule along with prompt and decisive action allows Complete Coach Works to maintain very reliable production schedules and meet our delivery commitments.

## ***Section 5: Financial Ability***

Complete Coach Works is a California Corporation established in 1987. We are headquartered on a ten-acre, state-of-the art facility in Riverside, California. We employ more than 180 full-time shop and administrative staff and have maintained a history of continued steady financial growth. In addition, we have maintained a strong balance sheet and have set the industry standard for prompt payment to its suppliers and subcontractors.

Complete Coach Works has invested more than \$1-million in equipment and tooling offering our customers the highest level of workmanship and product design. Our tool inventory includes TIG and MIG wire-feed welders, plasma cutters, certified and calibrated torque wrenches, and specialized bus lifts to ensure your bus is properly stabilized during all phases of production. Additionally, we carry an extensive line of specialized hand and air tools required for heavy equipment work as well as computerized engine and diagnostic tools.

Financial statements will be provided upon notice of award of City of Temp RFP 09003, "Transit Fleet Mid-Life Refurbishment."
